

Healthcare Information Systems Strategies, Inc.

CredStrategy™ – Provider Credentialing System

Today, healthcare organizations are faced with regulatory requirements that can be a productivity nightmare. CredStrategy™ was designed to take the pain out of the credentialing process.

- Insurance
- Demographics
- CME
- License
- Expiration Tracking
- Physicians
- Allied Health
- Affiliations
- Online Privileges
- National DB Links
- Document Scanning

To help providers of all sizes meet their growing need to effectively manage the credentialing of physicians and allied health personnel, HIS Strategies, Inc. has created the CredStrategy solution. CredStrategy is a comprehensive Medical Staff Credentialing solution that provides immediate access to all relevant credentialing

data from a single, user friendly source. CredStrategy brings complete, real-time Medical Staff information directly to the desktop, enabling the streamlining of the often complex credentialing process.

CredStrategy integrates the tracking of physician/allied health personnel licensure, insurance, contact information, boards, privileges, education, references and more into a single, easy-to-use software and hardware technology.

CredStrategy is an extremely flexible solution that can be tailored to meet your current and future needs.
